WINTER PARK, FL (November 3, 2008) – Land Design Innovations, Inc. was awarded the design services for the Palm Coast Airport Area Master Plan project. The City of Palm Coast, Flagler County and the Flagler County Airport (FCA), concerned for the future economic and development growth of the airport area, decided to partner on the planning efforts to ensure that the Airport's development potential and surrounding area develop harmoniously. The Master Plan will also include a Zoning Overlay with development standards.

Planning around airports is an intricate process that involves multiple local, county, state and federal agencies. The Flagler County Airport is a general aviation facility within unincorporated Flagler County, but is surrounded by the corporate city limits of Palm Coast. The approximately 14,000 acres encompassing the airport is largely undeveloped with countless development interests and activity.

###
