WINTER PARK, FL (May 23, 2008) – Deepti Dhiman, LEED AP, was named to the Job Analysis Task Force which was held at the Green Building Certification Institute (GBCI) Headquarters in Washington D.C. from May 13 - May 14, 2008. Ms. Dhiman currently serves as a Community Planner at **Land Design Innovations Inc.**, in Winter Park, Florida. (www.landbiz.com)

In January 2008, the administrative functions of the LEED Professional Accreditation program transitioned from the U.S. Green Building Council to the GBCI to allow for objective and balanced management of the credentialing program. As part of its normal operating procedures, GBCI depends on credential holders to volunteer and contribute toward the development and ongoing operation of credentialing programs.

The Job Analysis Task Force brought together subject matter experts from major sectors of the green building industry to identify and define required areas of knowledge that a LEED Accredited professional needs to have in order to carry out his/her duties. Ms. Dhiman represented the LEED Neighborhood Design team. Ms. Dhiman was the only “land planner” out of the total 30 volunteers that were invited for the Task Force meeting. As part of GBCI’s commitment to building and maintaining a quality credentialing program that is current, the Job Analysis Task Force will help determine how GBCI’s Accredited Professional program will develop.
